

ATTACHMENT B

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application.

1. (Currently amended) A Mmicrowaves blocker apparatus for use with an ~~for opening microwaves ovens, _installed at the entrance, front part and also at the exit, hinder part, of an opening microwaves oven, turning round the oven's entrance and exit allowing the free passage of the materials to be processed, characterized by comprising:~~

(a) an external surface a chamber made from a constructed of dielectric material, and coated with a metallic material;

(b) an internal surface made from the dielectric material;

(c) a first -and a second closing surfaces, connecting the external and internal surfaces, defining a chamber, the chamber having an opening with a lid, surrounded by metallic material,

wherein the blocker is constructed and arranged to have the identical which dimensions and forms follow the oven's shape of an opening of the open microwave ovenin which it is installed-, and a length longer that an operator's arm, and

wherein the chamber contains a substance capable of absorbing microwaves generated by the microwave oven, with a volume, quantity and thickness capable to attend a security standard for levels of exposition to the microwaves generated by the microwave oven.

2. (Cancelled)

3. (Currently amended) The Mmicrowaves blocker apparatus for opening microwave oven according to claim 1, characterized by a chamber which interior must be fulfilled with wherein the substance capable of absorbing microwaves generated by the microwave oven is selected from a group consisting of: substances of water consistence, sugars, and blubbers or any others that have the microwaves absorb capacity, all deposited in the chamber with volume, quantity or thickness capable to

attend the standards of security prescribed at technical rules for levels of exposition to the microwaves.

4. (Cancelled)

5. (Cancelled)
